This is an updated version of the first arrangement. Because the electrical code as of the 2011 NEC update requires a neutral wire in most new switch boxes, a 3-wire cable runs between the light and switch. The red and black are used for hot and the white neutral wire at the switch box allows for powering a timer, remote control, or other programmable switch.

Before wiring in new ATV or UTV accessories, you need to know how much of a power draw they will be and how much your machine can handle. For many of us, after we buy that brand new (or at least ...

Basic Wiring Tips for ATVs and UTVs - ATV.com
Speaker Outputs: The 500/1v2 amplifier's set-screw speaker terminals will accept 16 to 8 AWG speaker wire. Note: If your headunit does not have a dedicated remote turn-on output, the amplifier's turn-on lead can be connected to a +12V via a switch that drives power from an ignition-switched circuit.
