CIE's distance education Electronics Engineering course is an advanced-level course designed for technicians and engineers who want a deeper understanding of electronic circuits and advanced mathematics. Prerequisites are a high school diploma (or equivalent) with at least one year of algebra or geometry; or the completion of any CIE course, an in-depth working experience in the field of electronics, or the permission of CIE's Director of Instruction.

Electronics Engineering Course Distance Learning

Tokyo Institute of Technology, for instance, currently offers the introductory course, Introduction to Electrical and Electronics Engineering. In this four-week course you'll gain a basic knowledge of the interactions of electrical power, energy and environment. MIT offers a self-paced intermediate course, Circuits and Electronics: Amplification, Speed, and Delay. In this course you'll learn how to build amplifiers, the relationship between the mathematical representation of first-order ...
