Nautical Charts

Plotting sheets are "charts" designed primarily for open ocean navigation, where shorelines, visual aids to navigation and water depths are of no importance to navigation. Plotting sheets are also used for plotting positions and Lines-of-Position obtained by methods of Celestial Navigation. Commercially available plotting sheets contain a Mercator grid for a specific Latitude. This grid provides the correct ratio between the angular distances in

Using the dividers place one point of the dividers where $N 27^\circ$ intersects with $W 025^\circ$. Place the other point of the dividers horizontally across the $N 27^\circ$ line of Latitude and make a tiny mark. This second point is the location of the $Ap \lambda W 025^\circ 58'$ (remember- for ease of plotting the $57.5'$ was rounded up to $58'$).

Making An Ocean Plotting Sheet. Ocean plotting sheets are nautical charts designed for use at specific latitudes. They are used for ocean navigation where features such as shorelines, water depths and local tidal information are of no importance. Plotting sheets are particularly useful for plotting observed positions obtained by astro navigation. Purchasing ocean plotting sheets can be an expensive outlay particularly when they are required for navigation courses or
